

Vision

Andrew Morrill and
Cody Mckenzie

Problems

- Planning when to wake up
 - When you have to be there
 - How far you have to travel
 - How long it takes to get ready
- Difficult to make time for certain tasks
- Getting around to your class on time

Our idea to fix it: Schedule

- From waking up to your destination
- Sets alarm for you.
- Optionally Gives directions to destination
- For OSU students:
 - Drop down menu for building at OSU
 - Closest parking lot directions (C, B, A)
Or preferred parking location

SUPER SCHEDULER

Date:

Ready Time: 30 min use? Yes ☒ No ☐

Destination 1: Linn Benton Community College

Begin: 9:00 AM End: 9:50 AM

Destination 2: Weniger Hall (OSU) ☐

Begin: 12:00 PM End: 1:50 PM

Preferred Parking: C (closest) ☐

Add Destination Add OSU Distination

What we will use

- Android initially (for this project)
 - Use Java
- Google Maps API
 - Location, distance, time
 - 2,500 free calls/day
